YOU'RE GETTING WARMER

What does better ventilation mean anyway? It means better control for odor and smoke. Plus, this microwave doesn't just heat food, it also keeps food warm and ready to serve for up to 90 minutes.

QuietPower™ Ventilation System

With an Over-the-Range Microwave Oven, strong ventilation is key. That's why LG has created the QuietPower vent, which does the job quietly, without interrupting your life.

Warming Lamp Feature

Keep your food warm and ready to serve for up to 90 minutes. The warming lamp uses a radiant heating element to keep food warm.

Sensor Cooking

Reduce the guesswork in cooking. Humidity-sensing technology determines when food is cooked and automatically turns off the microwave to help prevent the over- or under-cooking of meals.
